

Security Check Report

Domain: demo-shop.test **Date:** 04 October 2026 **Checked by:** Victor

Problems found

Critical	High	Medium	Low
0	0	0	0

Fix these first

No problems were found by these checks.

Already good

- DKIM record found
- Certificate is valid
- Security headers look good
- No exposed files found

Technical details

What this check cannot see

This is an outside-in check of public information. It is not a full penetration test. It does not log in, test passwords, or look inside your systems. It can miss problems, and a clean report does not guarantee you are safe. Each finding lists its own limit.
